Email: randy@insurancebyraines.com

I started Raines Insurance Group in 2011 as a way to make a difference. Prior to that I had been an insurance agent for six years working for captive agencies that would not allow me to do all that I wanted for my clientele.

It is through joining NICIA that I learned of a niche in the insurance industry that other agents were not providing. This realization encouraged me to become better educated on creating policies designed specifically for the members of this great program.

As a member and a vendor of this organization, I have grown to care about fellow members and the well being of their businesses alike. I would like to be an instrument in business development and aid in growing the group with positive feedback and utilization of the vast knowledge that this organization holds.

One of the goals that I would like to see attained is to have smaller sub groups that would gear themselves toward more individualized levels of mastery on the subject of investing. While the meetings that NICIA hold once a month are great at setting the ground work, I believe that having sub groups catering to different investment types would prove beneficial.

Please consider my application and bio as my proposal for board placement.

Best Regards,

Randall Raines
